Examples of such uncertainties and contingencies include, among other important factors, those affecting the insurance industry generally, such as the economic and interest rate environment, federal and state legislative and regulatory developments, including but not limited to changes in financial services, employee benefit and tax laws and regulations, market pricing and competitive trends relating to insurance products and services, acts of terrorism or war, and the availability and cost of reinsurance, and those relating specifically to Delphi's business, such as the level of its insurance premiums and fee income, the claims experience, persistency and other factors affecting the profitability of its insurance products, the performance of its investment portfolio and changes in Delphi's investment strategy, acquisitions of companies or blocks of business, and ratings by major rating organizations of Delphi and its insurance subsidiaries. These uncertainties and contingencies can affect actual results and could cause actual results to differ materially from those expressed in any forward-looking statements made by, or on behalf of, Delphi.
